Emergency Water Service Termination

LTMUA employees may attempt to terminate a water service at the request of the property owner for emergency reasons only.

1. If a water pipe is broken in the house and the customer is unable to turn the water off in the house.
2. If a water pipe is broken on the property.
3. If the bottom of the water meter is blown out.

LTMUA employees will:

Generate a work order with the date, time, address, name of person calling and a telephone number of the person requesting the emergency termination.

They may then attempt to terminate a water service at the curb stop or water meter pit in an emergency to stop the loss of water and possible damage to the property.

Water Service Restoration

When a water service is restored, LTMUA employees will:

Require the property owner, resident or plumber is on site at the time of restoration. If the property owner is unable to be present then the office may fax a release form to the customer. Once the form is completed and returned, the office will issue a work order to restore the water service.

The LTMUA will not be responsible for any damage or problems occurring from the termination or restoration of any water service.
